

DINAK

Chimney Systems

Innovative solutions for chimneys and ducts

Direct flues

directflues.co.uk

dinak.com

A brand, a product, a philosophy, an answer to the market needs and requirements.

More than
30 years
 developing our values of

Our history starts in 1983, becoming the first Spanish manufacturer of stainless steel modular chimneys.

We are specialists in the design, manufacture and installation of domestic and industrial modular chimneys, selfstanding chimneys, along side general ventilation towers.

Our aim from the beginning was to obtain a technically excellent product with the assurance of quality, durability whilst offering a service level that would give Dinak a leading position in the market. Following this philosophy we have developed the business to strengthen our position in the Spanish market.

In 1993 we started our international expansion program opening our first international branch in Lyon, France, being followed by the opening of our branches in Italy, Belgium, Germany, UK and Poland. Today, our company has become an international reality, with Dinak branches in 7 European countries and commercial activities in more than 24 markets through our partners contributions.

We are well aware that our acquired experience is not enough to grant us leadership in the market place and we are faithfully commitment to our core values of effort, innovation, service and development along with the aim to continuously overcoming and meet market requirements, creating a technically excellent products. These values and believes enable us to stand out in today's market, offer an unbeatable service, all of this is brought about by over 30 years of continuous development and partnership with flue and chimney specialists throughout Europe.

ENTHUSIASM

IMAGINATION

INNOVATION

RESPONSIBILITY

COMMUNICATION

EFFICIENCY

WE ARE PASSIONATE ABOUT WHAT WE DO

We encourage an entrepreneurship spirit, professionalism, enthusiasm and implementation of plans by the people shaping our team and all of our team set themselves new objectives, a process of continuous improvement which keeps all of us at the top of our game and being at our best every day.

Innovation, quality, service and adaptation are the key words of our daily work: we develop our product portfolio innovating and trying to satisfy all market segments, from the simplest domestic installation to the more complex industrial installation. We offer global solutions at a competitive price, with the assurance of quality, integrated support and advice service to our partners.

Our product specialisation and commitment to quality are connected to our institutional presence: we actively promote the norms in our industry by taking part in various Standardisation bodies such as the European Committee for Standardisation of Metal Chimneys Standards (whose President is our CEO), the Spanish Association of Chimney Manufacturers (AFECH) and the European Chimney Association (ECA).

Insulated twin wall chimney

The DW can be used for wood stoves, for inside or outside installation of chimney

0036 CPD 90220 001

EN 1856-1 T600 N1 D V2 L50040 G60

MATERIALS

- Inside wall: Stainless Steel AISI 316L - 1.4404.
- Outside wall: Stainless Steel AIS 304 - 1.4301.
- Insulation: mineral wool 30 mm.

TECHNICAL SPECIFICATIONS

- 40 mm overlapping.
- Available diameters: Ø 130 to Ø 300.

ADVANTAGES

EXPANSION ABSORPTION

Thanks to its exclusive manufacturing system, the DW expands freely.

THERMAL CONTINUITY

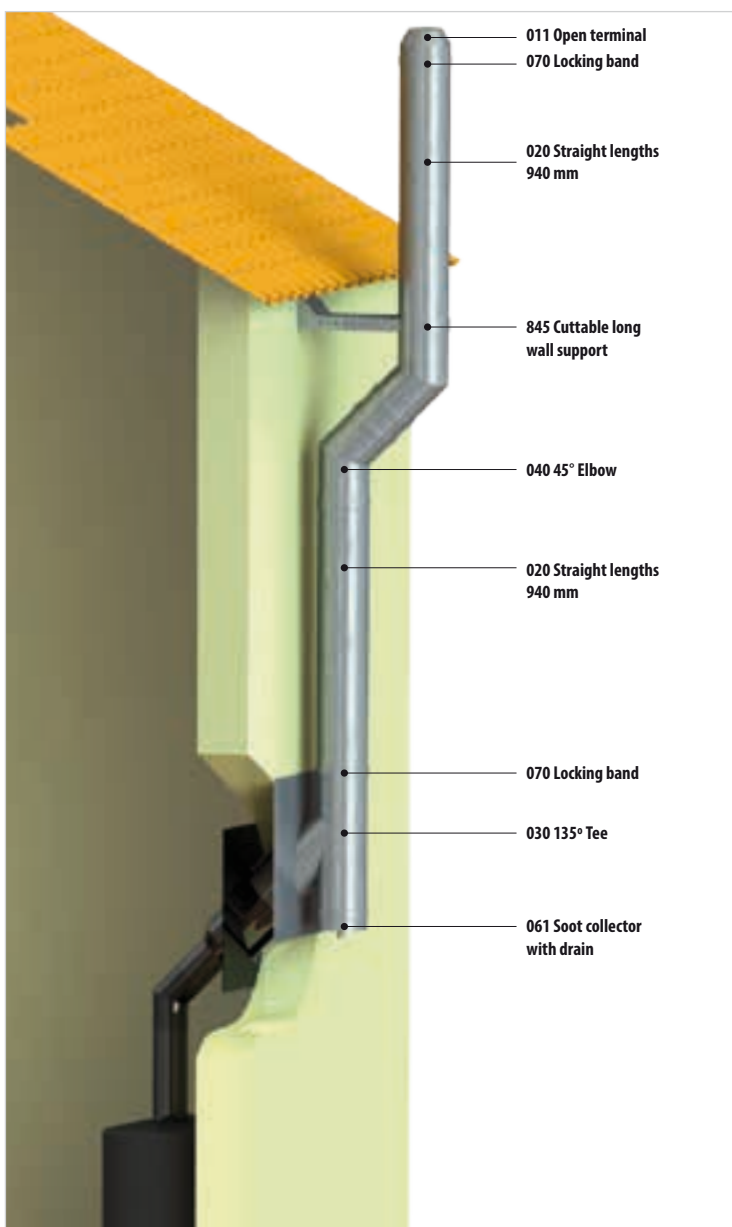

The continuity of the insulation ensures an optimum draught
With the DW, thermal bridges are over!

INSULATION

The insulation quality of the DW system optimises the technical efficiency of the appliance and reduces the noise levels.

TERMINALS

Dinak gives you the option of choosing from many kinds of terminals (See Dinaroof range). Dinak can produce your flues in colours (RAL range) or in copper.
