## BY EMAIL ONLY

Dear Mr Lewis

**Planning consultation:** Reserved Matters Application to 10/01642/OUT - Erection of 74 dwellings with associated car-parking, infrastructure and public open space.

**Location:** Former Building 32 And Adj Land At Heyford Park Camp Road Upper Heyford Bicester OX25 5LX.

Thank you for your consultation on the above dated 02 September 2014 which was received by Natural England on 02 September 2014.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

### **The Wildlife and Countryside Act 1981 (as amended) The Conservation of Habitats and Species Regulations 2010 (as amended)**

The lack of specific comment from Natural England should not be interpreted as a statement that there are no impacts on the natural environment, but only that the application is not likely to result in significant impacts on statutory designated sites, landscapes. It is for the local authority to determine whether or not this application is consistent with national or local policies on biodiversity and landscape and other bodies and individuals may be able to help the Local Planning Authority (LPA) to fully take account of the environmental value of this site in the decision making process, LPAs should seek the views of their own ecologists when determining the environmental impacts of this development.

We would, in any event, expect the LPA to assess and consider the possible impacts resulting from this proposal on the following issues when determining this application:

#### **Protected species**

We have not assessed this application and associated documents for impacts on protected species.

Natural England has published [Standing Advice](#) on protected species. The Standing Advice includes a habitat decision tree which provides advice to planners on deciding if there is a 'reasonable likelihood' of protected species being present. It also provides detailed advice on the protected species most often affected by development, including flow charts for individual species to enable an assessment to be made of a protected species survey and mitigation strategy.

You should apply our Standing Advice to this application as it is a material consideration in the determination of applications in the same way as any individual response received from Natural England following consultation.

The Standing Advice should not be treated as giving any indication or providing any assurance in respect of European Protected Species (EPS) that the proposed development is unlikely to affect the EPS present on the site; nor should it be interpreted as meaning that Natural England has reached any views as to whether a licence may be granted.

If you have any specific questions on aspects that are not covered by our Standing Advice for European Protected Species or have difficulty in applying it to this application please contact us at with details at [consultations@naturalengland.org.uk](mailto:consultations@naturalengland.org.uk).

### **Local sites**

If the proposal site is on or adjacent to a local site, e.g. Local Wildlife Site, Regionally Important Geological/Geomorphological Site (RIGS) or Local Nature Reserve (LNR) the authority should ensure it has sufficient information to fully understand the impact of the proposal on the local site before it determines the application.

### **Biodiversity enhancements**

This application may provide opportunities to incorporate features into the design which are beneficial to wildlife, such as the incorporation of roosting opportunities for bats or the installation of bird nest boxes. The authority should consider securing measures to enhance the biodiversity of the site from the applicant, if it is minded to grant permission for this application. This is in accordance with Paragraph 118 of the National Planning Policy Framework. Additionally, we would draw your attention to Section 40 of the Natural Environment and Rural Communities Act (2006) which states that '*Every public authority must, in exercising its functions, have regard, so far as is consistent with the proper exercise of those functions, to the purpose of conserving biodiversity*'. Section 40(3) of the same Act also states that '*conserving biodiversity includes, in relation to a living organism or type of habitat, restoring or enhancing a population or habitat*'.

### **Impact Risk Zones for Sites of Special Scientific Interest**

Natural England has recently published a set of mapped Impact Risk Zones (IRZs) for Sites of Special Scientific Interest (SSSIs). This helpful GIS tool can be used by LPAs and developers to consider whether a proposed development is likely to affect a SSSI and determine whether they will need to consult Natural England to seek advice on the nature of any potential SSSI impacts and how they might be avoided or mitigated. Further information and guidance on how to access and use the IRZs is available on the [Natural England website](#).

Yours sincerely

James Hughes  
Sustainable Development Consultation Team
