

Zeta GLS Bulbs

The GLS LED bulbs offer a direct replacement for old incandescent bulbs and are the ideal choice for both domestic and commercial environments.

Available in B22 (bayonet) and E27 (standard edison screw) cap types, the range of GLS bulbs provide a reduction in energy consumption of up to 90%, use a very low wattage (equivalent to 40W) and have an average life of 20,000 hrs; saving you money on your energy bills whilst still providing high lumen output.

Specifications

Specifications
