Comments	<input type="text" value="The road infrastructure in this area is appalling. A 700 space car park with rammed trains that often arrive at the same time at peak times means Higham Way, Merton Street, Marshall Road and Middleton Road are often at gridlock. Adding in extra homes will cause more mayhem, never mind the construction vehicles required to access the area. If no additional support is added to the infrastructure, including at the bridge street lights as well as the Middleton Road/Merton Street junction, there will be total gridlock. Most days it can take 30 minutes to clear this junction. No additional support was given to this junction when the car park was built. A new development will tip this area over the edge and cause mayhem. I strongly oppose these plans."/>
