Comments	<p>Without investing in the town before you build anymore you are creating conditions for traffic chaos and an already over developed and dilapidated town which is verging on becoming slum like. No more housing developments must be approved unless they are about plans to revamp the town centre first. the roads are blocked, the fumes are polluting us. We are entitled to have quality of life in the town. The town is run down and slum like. It is nothing to be proud of. Put money into the town centre first then look towards any further development needs. It's dangerous socially to approve any more housing developments until infrastructure can support existing ones which it cannot. The priorities are all wrong. You only have to look at the state of the town and how it has severely declined and is in fact filthy. No more houses until infrastructure and investment in the area generally. What more developments do without being able to short locally is create slums and social issues. Where is the investment in the town to go alongside this?</p>
