## **YOUR COMMENTS ON THE CASE**

Good mobile telephone signal is probably something which is taken for granted by most people that live or work in an urban environment. For those of us that live in a rural environment life is somewhat different, particularly given that we live in a world in which information technology provides significant and varies communication and access to information.

A mobile network tower located on high ground between Epwell and Sibford would do much to improve the lot of many homes and businesses located in and around the two villages. I request that the Planning Inspectorate reconsider the application and find in favour, thereby making a positive contribution to the quality of lives and businesses in the area. Thank you.
