YOUR COMMENTS ON THE CASE

Our whole family need a satisfactory mobile signal for the following reasons:

Farm safety - we all carry a mobile phone us these days but the signal covers an inadequate part of our surrounding area in case of an emergency across the fields especially at busy times of the year ie harvest/haymaking. One needs to be assured that anyone working outside can make a call on their mobile.

Receiving emergency calls is equally important as many of us in this rural work alone. There are many areas in our locality that are void of a signal - whether to do with emergencies or business calls.

Even a simple text message is tricky to send or receive - usually the quickest way to contact anyone immediately.

Our businesses rely on mobile phones in favour of landlines due to better financial deals offered by the mobile providers.

We just REALLY NEED an acceptable, efficient mobile signal in this area.
