

Bin Store Materials & Specification Notes

The Bin Store is formed of a 100mm X 50mm box steel structure with pressure treated soft wood timber cladding fixed to the frame. All steelwork on the bin store is hot dip galvanised to BS EN ISO 1461. All doors on the bin store are supplied with Europrofile cylinder locks for added security.

The bin store will be post fixed to an insitu reinforced concrete slab with a designated gully point which will drain to foul.
