

Play Equipment:

Sculptural play: Domino, Ref. CP-01-0140
Manufacturer: Russell Play, Age range: 3+ years

Sculptural play: Bauble, Ref. CP-01-1110
Manufacturer: Russell Play, Age range: 3+ years

Focal square street furniture

Circular seat within focal square e.g. Woodpecker circular tree seat in
litterbox. Note: Mantis irrigation cap should be added to be easily
accessible (ie offset from bench supports/legs)

Circular tree grille frame with resin bound surface fish e.g. Britanny
Bronze Arbreform by GreenBlue Urban or similar approved

Tree Guard e.g. a Broom Standard Mist Steel Tree Guard BX14 602
or similar approved

SUMMARY PLANTING SPECIFICATION

This implementation and maintenance guidelines are for planning purposes only to indicate the level of workmanship to be specified and do not constitute a detailed specification.

1. GENERAL

- 1.1. All landscape operatives will be appropriately trained, certified and qualified to undertake the tasks required. When required, the relevant certificates will be made available for inspection. All work is to be carried out in accordance with the relevant British Standards, Codes of Practice and Legislation.
- 1.2. All plants shall conform to BS 3098 and be in accordance with the National Plant Specification. Supplying nurseries shall be registered under the HTA Nursery Certification Scheme. All plants shall be packed and transported in accordance with the Code of Practice for Plant Handling as produced by CPSE.
- 1.3. Planting shall not be carried out when the ground is waterlogged, frost bound or during periods of cold drying winds. All bare-rooted planting stock will be kept covered until actually planted in order to minimise water loss and prevent the roots from drying out. Tree handling, storage and planting shall be in accordance with BS 8545 Chapters 9 to 10 and Appendix E to F.
- 1.4. The landscape contractor shall maintain all areas of new planting for a period of 12 months following practical completion. All stock deemed to be dead, dying or diseased within the defects period shall be replaced by the contractor at its own cost.

2. TREE PLANTING

Ground Preparation and Tree Pit Excavation

- 2.1. Where necessary treat existing weeds with a glyphosate based herbicide and allow a suitable period to elapse, as recommended by the manufacturer, for the herbicide to take effect.
- 2.2. Tree pits (circular) of at least 75mm diameter greater than the root system and no deeper than the rootball / container depth are to be excavated and the sides well scarified to prevent smearing. All excavated matter such as plastic, wood, metal and stones greater than 50mm in any dimension shall be removed from site.
- 2.3. During excavation of the pit, the soil dug should be placed to one side separating topsoil and subsoil as far as is practical.

Tree Planting

- 2.4. Trees shall be planted as per the planting arrangement as set out on the planting plan, according to the plant schedule and with regard to Tree Pit Details (Dwg ref. B.0285, 1234).
- 2.5. The typical rooting depth for trees is 900mm. The first 300mm shall be made up of topsoil; it shall be ensured that a suitable subsoil provides the remainder of the minimum rooting depth.
- 2.6. The root system of the tree should be wetted prior to planting. The tree should be planted at the correct depth taking into account the position of the root flare and the finished level. The rootball or root stem transition should be level with the existing host soil or surface. The base of the rootball should typically sit on subsoil, for larger rootballs the subsoil will sit around the lower portion of the rootball.
- 2.7. All non-perishable materials protecting the root ball (such as tree cagelocking) are to be removed before planting.
- 2.8. Tree pits shall be backfilled with the excavated topsoil, if the original topsoil is not available or deemed unsuitable, a multi-purpose topsoil should be used. Any subsoil excavated should be discarded.
