Type of Comment Objection

Type neighbour

Comments The documentation provided by the applicant does not appear to provide justification for the need of the proposed bus gate on Camp Road. This alone should be grounds for refusal of the bus gate. The traffic impact survey suggests that there could be more than double the number of vehicle movements per hour at peak times through North Aston, with consequent tailbacks at the junction with the A4260, which is already a dangerous junction. It is likely that because of the frustrations of drivers having to queue for so long at the junction, more will be inclined to take a risk leading to further road traffic accidents and possible loss of life. This should be grounds for refusal as the council has an overriding duty of care and the preservation of life.
