Dear Sir,

I write to protest in the strongest possible terms at the appalling plan to re-route HGV traffic from the B430/A4095 junction to use the A4095 through Chesterton to link up with Vendee Drive and Howes Lane.

At one end of the village, there is a 90-degree bend at the Hale junction, where it would be very difficult for HGV and other vehicles to pass safely without mounting the pavements to avoid collision. At the other end, there are a chicane and speedbumps, already placed there some time ago in recognition of the ever-growing volume of traffic on the A4095 through Chesterton. This proposal can only exacerbate this problem.

And, of course, people do live along this road! I am one of them! There will be a further increase in both noise and air quality. Small children need to cross this road every day to reach the village school; other residents, some elderly, need to cross this road if only, for example, to post a letter. The visibility of oncoming traffic in both directions is poor. There is a new housing estate off The Hale from which small children have to walk along this part of the A4095 to go to school, because the promised footpath across the allotments has not been forthcoming.

Yours faithfully

H R JENKINS
STONE COTTAGE
