**Subject:** HGV routing on A4095 through Chesterton

Dear Mr Lewis

I am writing to express my opposition to the proposal to route HGVs through Chesterton.

It is totally inappropriate, with parked vehicles, a 90 degree bend at the Hale junction and the chicane by the speed hump making it a dangerous proposition.

The noise and levels will increase and the air quality levels will decrease.

The more logical and sensible option would be to use the B4030 by Howes lane/Vendee drive.

I hope you and decision makers at CDC will listen to the views of the local residents.

Kind regards.

Owen
