

TWIN BIKE LOCKER

To keep your bikes as secure as possible, this all-metal bike locker is fitted with the same ultra-tough 3-point locking system as our big units, which are pick and drill resistant. The difference between the Bike Storage x 2 unit and the larger units is that it is accessed from the end, so the width of the locker is kept a minimum. This means the Bike Storage x 2 unit is ideal for down the side of a house or flat.
