4th June 2019

Dear

Proposals by Rectory Homes to develop the land between our house
and the Telephone Exchange known locally a '60 foot'

I attended an informal Parish Council meeting 2 weeks ago where Rectory presented their plan to develop the land between our house and the Telephone exchange.

I am writing to you as I believe what they propose is both dangerous and a needless destruction of this charming entrance into the village, which should surely be cherished and retained? We have spoken to many people in the village who are quite frankly aghast that the character of this charming rural village will be ripped apart by these proposed needless works, aided and abetted by crude ugly signage.

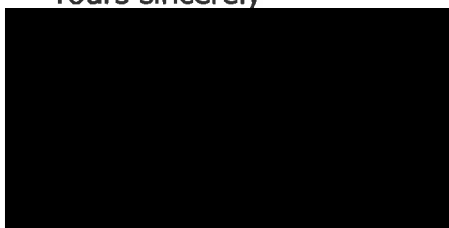

I enclose a simple photo of the existing aspect.

The Rectory proposals seek to replace this with an unprotected footpath, different coloured tarmac and ugly signage which supposedly will 'encourage' motorists to give way?

The cotswold stone crazy paved area outside our front door has been there for over a 100 years and was described by the Rectory spokesman as 'just random stone'.

I have no doubt that an application from me to concrete the area would be rejected on numerous Conservation grounds, so please reject this one too!!

Yours sincerely

George Dailey

P.S. Dr. Todd we are away for about 3 weeks from next Tuesday, so this letter to you is in anticipation of Rectory lodging their application.
