Subject: NORTH ARMS, WROXTON. PLANNING APPLICATION 19/001148/F

PROPOSED KITCHEN EXTRACTOR FAN

I am more than concerned with the kitchen being so close to my house and garden. Photo. showing how close this will be from my bedroom window as under.

The proposal indicates the kitchen will have a low level extraction and discharge of cooking fumes will directly affect my property and Lavender Cottage. We will both have the noise and odour directing into our properties and garden. There is the chimney (unused) above the North Arms sign. Could the extractor be directed there?

I am deeply concerned about this and strongly object to this extractor fan and the proposed site for this.

PARKING

I am also concerned about the parking in the village as the North Arms will have many more covers than ever before as a village pub. We already have many cars parked in the village especially at weekends with visitors to the collage and even returning villagers not being able to park their cars.

Sylvia Brough, "Woodcote" Mills Lane, Wroxton.
