Caroline

Apologies for the delay in responding

River Crossing Plan

Just need to confirm that the finished regrading to the lowest side of the path near the river gently falls away from the edge of the path to avoid runoff from collecting in puddles and become very muddy 9ans (slippery when frozen).

It is hoped that all regrading is sloped with a finish that is level with the top of the kerb.

Boardwalk Construction Detail

The oak material is to be from sustainable oak woodland supply.

150 mm (above surface) kickboard on both sites is required to prevent persons from slipping off the edge

Handrail is required on both sides for user mobility and safety reasons.

Regards

Tim
